

JAAPA Article Submission: Author Information

IDENTIFYING INFORMATION

Title of article

Submission date

Names of all the authors of this article in the order they should appear on the published article. Include credentials (PA-C, etc) for each author. Identify the corresponding author.

Work affiliations for each author as these should be listed on the published article. Include, as appropriate, position title, institution or practice, city, and state. If an author does not have a formal title, describe what the person does: eg, John Smith practices family medicine at.... (As much as possible, the work affiliations should make clear to the reader each author's experience/knowledge in the topic area.)

Contact information for corresponding author. At minimum, an email address and a telephone number where we can reach you directly are required.

ARTICLE DETAILS

Section or department in *JAAPA* for which your article is intended (eg, CME article, Case Report, Dermatology Digest, etc).

Briefly explain your expertise (and that of any co-authors) in the topic area.

Does your article contain any accessory items (that is, material in addition to the main text, such as tables, photos, imaging studies, graphs, algorithms, illustrations, etc)?

Yes

No

If yes, list each accessory item below by number and title (eg, TABLE 1. Drugs used to treat type 2 diabetes).

- After each item, state whether the item is (1) original to you, (2) reprinted or adapted from a previously published source (and thus will require permission from the original publisher to use), or (3) created by you from information taken from another source (and thus will require a source line but not permission).
- For items in categories 2 and 3, provide a complete citation of the original source.
- For items in category 2, provide contact information for the publisher.

Important note: Do not request permissions yourself. *JAAPA* staff will do this, as we have certain legal requirements we must satisfy to use previously published material.

Are you submitting photographs or imaging studies?

Yes

No

Note that these must be high-resolution digital imaging files (minimum 300 dpi/400 KB).

- Images must be jpeg, tiff, or eps format.
- If the pathology on the image will not be clearly obvious to readers who don't work in your specialty, submit a duplicate copy of each image with arrows or other markings to highlight the area of interest. These duplicates may be PowerPoint files or images embedded in a Word file.
- Submit large files in individual emails, contact the editor for information on uploading to our ftp site, or mail them on a CD.

Do you have hard copies of your references?

Yes

No

- If your article is accepted, we will require hard copies of your references for use during editing and fact-checking.
- Journal articles and book chapters must be provided in full.
- For entire books, submit pages showing title, author, and publication information.
- References may be submitted electronically on a CD or via email.

DISCLOSURES

Is this manuscript original, written by you (and any co-authors), and not ghost-written by anyone not named as an author?

Yes

No

Has any pharmaceutical company or medical education company been involved with or paid for any part of the development of this article?

Yes

No

Has this article been previously published?

Yes

No

Has this article been submitted to any other publication (including online publications) at the same time that it is being considered by *JAAPA*?

Yes

No

Please submit the completed form by e-mail to jaapa@haymarketmedia.com.
